

Our Goal: Net Zero Direct Emissions

- Carbon Reduction and Reporting Strategy with all our emissions externally verified on a yearly basis
- Entire delivery fleet switched to HVO fuel in 2020 with remaining emissions offset
- Offices to be powered by renewable energy in 2023 - solar panels on buildings and modern electric heating in oil centre
- Recycling all old IT equipment and barrels
- Heat recovery and ventilation system to reduce emissions and create a healthier work environment for staff
- Reducing our use of plastics and paper
- Setting up community initiatives such as tree planting, improve recycling, energy reduction etc.
- All delivery routes planned to minimise delivery miles and reduce GHG emissions
- Fuel system pump upgrades in 2028
- Small vehicles to be electric in 2029

The end game...

April 2022: Carbon neutral
2030: Net zero direct emissions
